

Compassionate Care for Women

Medication Information

Brandon Gynecology Associates, PA's electronic health record system can access patient medication information from their pharmacy. The information is entered directly into the medication section of the patient's history. This feature allows for accurate documentation and review of a patient's current medications, reduces drug interactions, and makes for an efficient office visit. This information is only used for the patient's medical care.

I have been informed about Brandon Gynecology Associates, PA's ability to retrieve my medication information directly from my pharmacy.

By signing below, I give Brandon Gynecology Associates PA permission to obtain my medication information from my pharmacy. This information will be used for my care and treatment.
